

Step 1 describe: for example let's say he is my friend so, a student at my middle school was being bullied by classmates by sending him mean messages to his instagram account

Step 2 reflect: I wanted to stop them from doing it because he was one of my friends and they were making fun of him because of his accent and i didnt like it because there's no reason to do it and there's no fun in it

Step 3 solutions: I report the bullying directly to the principal and i also talk to him to not let them see that you are pissed about it because they are going to keep doing it so he can just crashed out

The next steps

Be more supportive, encourage him to speak up with someone of his family or counselor, and include him more in my group so he doesn't feel like he is alone

Who is involved?

The principal, Me, friends, classmates, counselors and parents
